

## SOLUTIONS BRIEF

# IS/IT MANAGER

Are you running on empty integrating overly complex logistics technology?

**Get your logistics up to speed:** Breathe new life into your supply chain, ramp up security, and integrate turnkey logistics technology with Cargo Signal.

The data-driven world is moving faster and faster. Luckily, digital solutions are too. As an IS/IT Manager in global logistics, you are in the unique position to integrate systems that streamline your organization. The IoT-powered sensors that Cargo Signal attaches to global freight provide real-time data about shipments and deliver end-to-end supply chain visibility and security. Better yet, Cargo Signal is turnkey technology: Our API allows you to swiftly integrate your systems and access your data from whatever platform is most convenient for you and your customers. Our technology is supported by a Command Center staffed by logistics professionals ready to offer advice 24/7, 365 days a year. They can help set customizable alerts of your choosing, so you can stay informed of what matters most. With Cargo Signal, you can save yourself the time and hassle of integrating complex systems while staying one step ahead of a fast-paced world that shows no sign of slowing down.

### CARGO SIGNAL CAN HELP YOU

- Integrate cutting-edge logistics technology into your systems and extract data with our API.
- Provide peace of mind to your stakeholders, with the assurance that your data is secure, accurate, and up to date.
- Streamline your operation with user-friendly IoT-powered technology and move away from software that relies on overly complex systems of data collection.
