

## SOLUTIONS BRIEF

# VP OF LOGISTICS

How often is your supply chain out of sight, or worse—out of mind?

**Get the whole picture:** Expand supply chain visibility, showcase real-time data, and increase the accountability of your operations with Cargo Signal.

You may have a clear view of day-to-day operations within the four walls of your company, but what about outside? Supply chains can be difficult to oversee in their entirety. As a VP of Logistics, people depend on your ability to ensure that all logistics are running according to plan. They also depend on your ability to showcase reliable information. The IoT-powered sensors that Cargo Signal attaches to global freight track real-time data about shipments as they make their way through the supply chain, providing end-to-end visibility. Our technology is supported by a Command Center staffed by logistics professionals who monitor your shipments around the clock. With more accurate data on your side, your tactical teams will perform better, which will allow you to perform better and focus on more strategic matters like optimizing your cash cycle or revenue recognition processing. Supply chains are fragile, and you can't always plan on everything running smoothly. But you can plan on having the best tools at your disposal.

### CARGO SIGNAL CAN HELP YOU

- Attain real-time end-to-end visibility of your supply chain, from the moment your freight ships to the moment it arrives at its destination.
- Consolidate data about your supply chain logistics in one easy-to-use and presentable platform, backed by a team of logistics professionals operating 24/7, 365 days a year.
- Locate and resolve pain points in your supply chain, with increased transparency of transportation and warehouse operations.
