

IT'S TIME FOR SMART CARGO:
REAL-TIME, IN-TRANSIT QUALITY ASSURANCE

ACTIVE MONITORING AT YOUR FINGERTIPS. AROUND THE CLOCK.

Rather than entrusting your cargo to data loggers, which can get lost in transit and can't pinpoint the exact time and location shipment damage occurs, Cargo Signal's sensors continuously and remotely transmit accurate real-time data about the quality of your goods.

Our customers leverage active quality monitoring to ensure goods remain safe from extreme heat, cold, humidity, or mishandling as they move toward their destination. When problems arise, you can intervene to save fragile or temperature- and humidity-sensitive shipments before they incur irreparable damage.

- Remotely track your cargo's real-time temperature, humidity, and physical safety without data loggers.
- Identify the exact time and location temperature fluctuation or environmental change impacted your freight.
- Intervene before incurring loss due to spoilage, physical damage, or theft.
- Ensure cargo remains within acceptable temperature/humidity safety parameters set by internal company policy or government regulation.

ACTIVE MONITORING AT YOUR FINGERTIPS. AROUND THE CLOCK.

CARGO MOVES 24/7. YOU DESERVE 24/7 QUALITY ASSURANCE.

SERVICE LEVELS AVAILIABLE

- **Data**

Log on to our platform to view the current location, status, temperature, and humidity-levels of your cargo.

- **Alerts**

Receive milestone notifications and stay alerted of specific shipments that experience fluctuations in climate or mishandling.

- **Command Center**

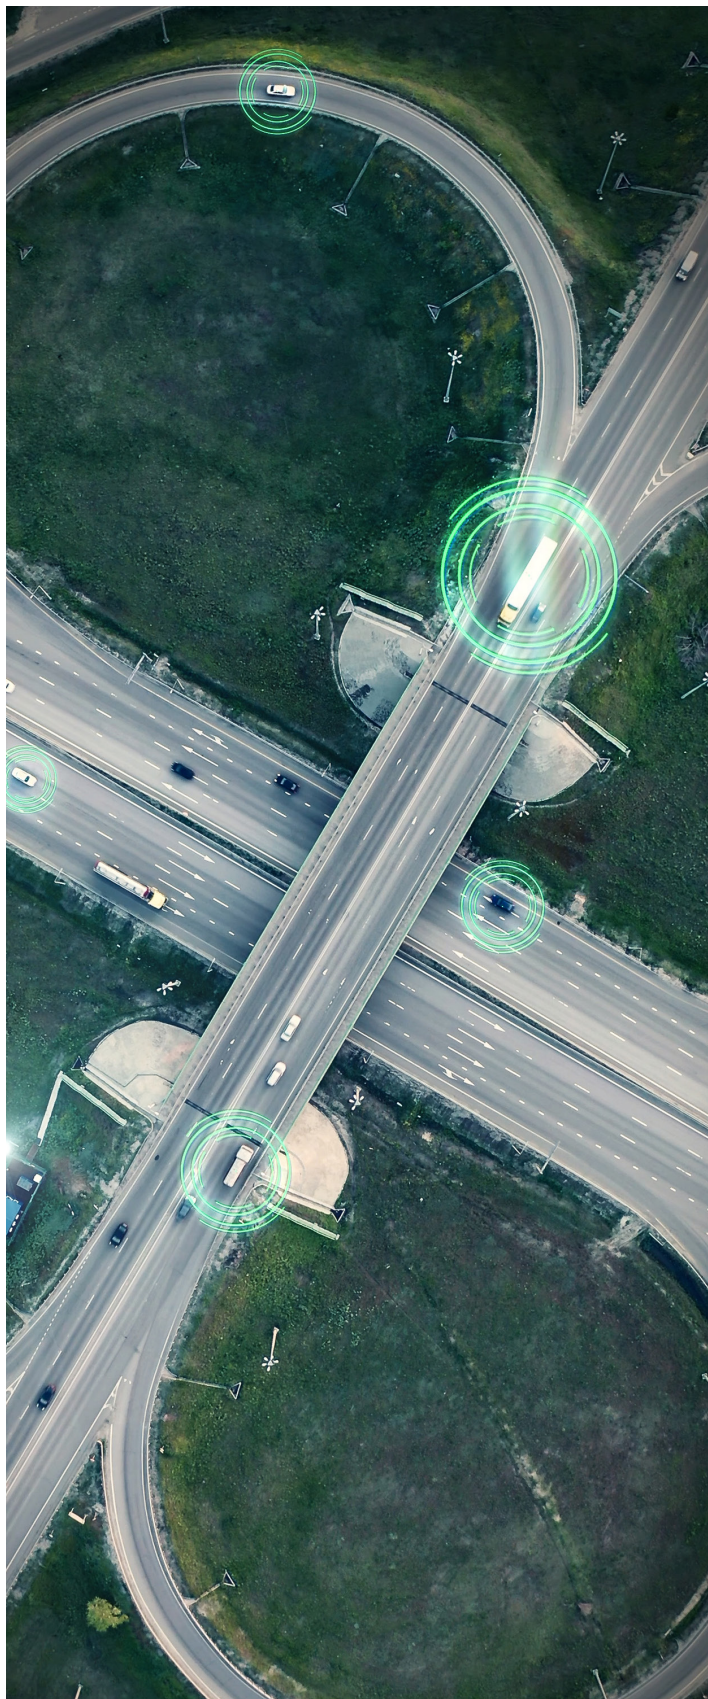

24/7 live monitoring 365 days a year focused on intervening in instances of undesirable temperature levels, humidity levels, and shock&tilt.

SENSOR DEVICES

- No reverse logistics
- Remote data transmission
- Pull-and-place application
- 2in x 2in size
- Compliant on all transportation modes

ALERTS YOU CAN CUSTOMIZE

- Light exposure
- Humidity
- Out of temperature range
- Consecutive temperature
- Cumulative temperature

With Cargo Signal you can utilize sensors and custom alerts to enhance the visibility, security, and quality of your global shipments and rely on 24/7/365 Command Center Intervention. Learn more about us at www.cargosignal.com
