

SOLUTIONS BRIEF

SECURITY MANAGER

How confident are you in your freight's security?

Keep more eyes on the prize: Broaden your visibility, avoid losses, and stay alert with Cargo Signal.

Your cargo is moving 24/7, making cargo security a 24/7 job. As a Security Manager, you are at the front lines of ensuring cargo safety. If all you have is access to milestone shipment data, you may not know your freight is in trouble until it's too late. The IoT-powered sensors that Cargo Signal attaches to global freight provide real-time data about shipments, backed by a Command Center staffed by a team of logistics professionals with diverse military, law enforcement, and insurance backgrounds. Our team monitors shipments around the clock, 365 days a year. And they are ready to put their expertise to work for you. Cargo Signal's platform provides you with up-to-date heat maps compiled from years of real-time, high-visibility data, and the Command Center team is on hand to help you navigate risk. If something goes wrong with your freight, our team will make sure you know immediately when and where, down to the very second and street. They will be ready to sound the alarm on your behalf, contact the authorities, and connect you to local resources to take immediate action.

CARGO SIGNAL CAN HELP YOU

- Muscle up your security with a platform that helps you navigate high-risk areas and provides you with a strategic defense team.
- Decrease losses by alerting you directly of the exact moment and location in which your freight has been compromised.
- Gain access to local and global assistance, when and where you need it, with our 300 offices worldwide.
